SZEGED ARMY BARRACKS NO 8, HUNGARY

This report is a partial answer to DIA requirement DIAXX 63-84, to verify the location of selected military installations in Hungary, and to perform a photo analysis of these installations to determine function, number of dimensions of buildings, to estimate troop capacity, to identify and describe related training areas and facilities, and to confirm or negate ammunition and POL storage. This report covers a specific military installation in the Szeged area.

Photography of [REDACTED] was used to determine dimensions and functions of buildings. KEYHOLE photography of [REDACTED] confirmed the location of this installation; however, due to poor quality photography, no additional information could be obtained.

The installation described below is shown on Figure 1.

Coordinates: 46-16-42N 020-06-08E

BE No: [REDACTED]

Troop capacity: 2,520*

This walled military installation covers 13 acres and contains:

*Troop capacity is computed on a basis of 50 square feet of space per man.

- 1 H-shaped multistory barracks building with 2 four-story wings 265 by 50 feet, and 1 five-story central section 80 by 50 feet, a total of 126,000 square feet of floor space
 - 2 administration buildings, one L-shaped 150 by 35, 75 by 35 feet, and one rectangular 135 by 35 feet, a total of 12,600 square feet
 - 2 storage buildings 190 by 35 feet, a total of 13,300 square feet
 - 1 revetted storage area containing 3 possible ammunition storage buildings 15 by 15 feet, a total of 675 square feet
 - 7 miscellaneous support buildings ranging from 90 by 40 to 10 by 10 feet
- no observed POL storage
- A 92-acre training area containing trench systems is located north and east of this installation.

The unconfirmed ammunition storage area reported at UTM coordinates 34TDS 247165 (geographical coordinates 46-11-50N 020-01-39E) is not observed. A one-nautical-mile-radius search from the above coordinates revealed no ammunition storage areas.
